Subject: AYLBURTON PC – CSW+ Signs, APPLICATION SCHEDULE.

Good morning, Mark/Rachel

GCC Highways is eager to help you address the number of high-end speeds that have been identified through the CSW+ programme. Impactful signage plays an important part in that it is a good visual aid for motorists to identify that speed cameras are present within your parish, and that they should be adjusting speeds accordingly. Signs also highlight the risk of enforcement for motorists who are travelling at inappropriate speeds.

The Gloucestershire Road Safety Partnership (GRSP) has recently approved the free supply and installation of 2 Boundary located signs to support your CSW+ non-ANPR camera installation (using existing support posts only). These signs are the larger of the two designs authorised to be deployed as illustrated Fig 1 below. The 2 free Boundary signs will be installed by a GCC appointed contractor at no cost to your parish at a scheduled time to coincide with other parish installations.

Scheme Ref.	30mph - CSW - Speed Camera Warning Sign		
Sign Ref.	878V2	x-height	60.0
Letter colour	N/A	SIGN FACE	
Background	WHITE	Width	600 mm
Border	BLACK	Height	645 mm
Material	Class R3B-UK	Area	0.39 m ²

Email confirming sign specifications

These signs are to be positioned on an existing post at either end of the road at or as near the parish boundary as possible as deemed most appropriate to your camera installation. Please do feel free to contact me for advice on this if you are in doubt about the suitability of a location.

Further to this, you are at liberty to purchase additional Boundary Signs to be installed at other boundary locations as appropriate to your needs. Once again you are encouraged to utilise existing support post wherever possible. These additional self-funded boundary signs will be supplied and installed by a GCC appointed contractor on a rechargeable basis. Costs will be available once this data collection episode is finalised, and contractors' prices are in.

Repeater signs, according to the design as below Fig 2 are also available for you to purchase on the same rechargeable basis. These signs may be placed along various routes within the parish boundary and at intervals to reinforce the message. You are under no obligation to make these additional purchases.
